## TRAINING PROGRAMMES

### CARDIOTOCOGRAPHY (CTG) TRAINING

Electronic Fetal Monitoring has become an integral part of assessing a fetus, especially with the rise in litigation in modern obstetrics. Most institutions have a CTG machine but most of us, the care providers, have not had any formal training with regard to the correct interpretation or with management protocols for an abnormal tracing. Fernandez Hospital fills the void with this short training programme.

### HIGH RISK PREGNANCY – OBSERVERSHIP (2 Weeks)

#### Overview of Academic Lectures

*Antenatal Care* : High Risk Pregnancy and Team Concept, Insight into ICU / HDU Care – What it Means, ABG Interpretation / Severity Scoring, Patient Evaluation / Stabilization of the High Risk Parturient, *Electronic Fetal Monitoring* : Antepartum and Intrapartum Use, Intrapartum Management of Labour – Use of a Partogram, Fetal Surveillance in High Risk Pregnancies, Role of Neonatal Team in Optimizing Outcomes, Importance of a Holistic Approach – Physician's Perspective.

#### The Clinical Posting

High Risk Pregnancy OP, Pre-Pregnancy Counselling OP, Diabetic Clinic, Nutrifit Clinic, ICU/HDU and LW posting.
