

HERF PRESENTS

# Advanced Life Support in Obstetrics ALSO

Be prepared. Be confident.  
Be ready for obstetric emergencies.

The Advanced Life Support in Obstetrics (ALSO) course is a structured, evidence-based training programme designed to strengthen the skills and decision-making of healthcare professionals managing obstetric emergencies during the perinatal and postnatal period.

International blended certification programme which combines flexible online learning with intensive, hands-on simulation training, helping you develop practical, life-saving skills while minimising time away from clinical work.

## WHO SHOULD ATTEND

- Obstetrics and Gynaecology residents
- Family Medicine physicians
- General Practitioners
- Healthcare providers involved in maternity care

## FORMAT

### Phase 1: Online learning (4 hours)

- Self-paced digital modules
- Access details shared after registration
- Ends with an online assessment
- Completion before skills workshop

### Phase 2: In-person skills workshop (1 full day)

- Mannequin-based simulation training
- Skills stations and real-time assessments
- Focus on teamwork and emergency response

This approach ensures deep learning with reduced crowding, while offering ample opportunity to practise & refine critical skills

## HIGHLIGHTS

- Safety in maternity care
- Medical complications in pregnancy
- Management of obstetric emergencies
- Preterm labour and PROM
- Interactive case-based discussions
- Learning methodology
- Audio-visual digital sessions
- In-person skill stations
- Practical skills assessment
- Team dynamics and communication
