

FERNANDEZ HOSPITAL EDUCATIONAL & RESEARCH FOUNDATION IN
ASSOCIATION WITH MEDGENOME LABS INVITES YOU TO A CME ON

Translating Genomics into Practice

BRIDGING PRENATAL AND PAEDIATRIC CARE

Genomic medicine is rapidly transforming healthcare from prenatal diagnosis to paediatric management. But the real impact lies in translating these advances into meaningful clinical care across every stage.

This comprehensive CME brings together experts across specialties to explore how collaborative genomic care can improve diagnosis, decision-making, continuity of care, and long-term outcomes.

WHO SHOULD ATTEND?

- Obstetricians
- Fetal Medicine Specialists
- Neonatologists
- Paediatricians
- Geneticists
- Genetic Counsellors
- Postgraduates and Registrars

KEY LEARNING OBJECTIVES

- Understand the clinical applications of genomic technologies in prenatal and paediatric practice
- Improve interpretation of genomic variants and evolving genotype-phenotype correlations
- Explore ethical and psychosocial aspects of prenatal and paediatric genomics
- Strengthen multidisciplinary collaboration for integrated patient care

CANCELLATION & REFUND POLICY

- No refunds or cancellations will be accepted
